

# OXBOW

## NEW COLLECTION 2018

# SUP

Oxbow is the name for a river that takes a meandering path on its journey to the ocean. Born in the mid-1980's in Normandy, France, the Oxbow brand found inspiration in this idea – a desire to wander and an understanding that life is about the journey, not the destination. Choosing nature and the relationship with the ocean as its founding value, the brand puts emphasis on the quality of its products and the pleasure they bring, providing new twists on fashion with an unconventional approach.

Oxbow developed alongside some of watersports greatest athletes, such as Laird Hamilton, pioneer of tow-in surfing, kitesurf, foilsurfing and stand-up paddle surfing. For 30 years, Oxbow has never stopped exploring new territories and supporting riders in pursuit of their passions.

The early 2000s saw the emergence and incredible growth of Stand Up Paddle, a new sport born from the convergence of these waves of enthusiasm. Oxbow has lent its support and experience to many top riders and events that have given visibility and an enduring legacy to the sport, including Laird Hamilton, pioneer of tow-in surfing, kitesurf, foilsurfing and stand-up paddle surfing. For 30 years, Oxbow has never stopped exploring new territories and supporting riders in pursuit of their passions.

Around the same time in France the Bich family, of BIC pen fame, united their passion for the sea with expertise in sustainable manufacturing to found BIC Sport. Today BIC Sport is a world leader in boardsports manufacturing, designing and building paddleboards, surfboards and windsurf boards using exclusive construction technologies in Vannes, France.

These two iconic French brands have joined forces to develop a new range of Oxbow Stand Up Paddleboards that embody the shared values, passion and philosophy of both companies. This exciting collaboration brings the best of each brand to the forefront with products proudly manufactured at the BIC Sport factory in France\* with the unique Oxbow look, feel and spirit.

We invite you to explore the new Oxbow range of paddleboards, paddles and accessories in the pages that follow.

\*All ACE-TEC Oxbow Stand Up paddle boards are made in France

# TECHNOLOGY

Oxbow ACE-TEC boards are built in France using proprietary thermoforming technology and a sustainable manufacturing process with zero emission, low energy consumption, no solvents and an extremely low rejection rate. With over 30 years of proven consistency and quality using these techniques, we know molding. The distinguishing features of Oxbow's molded technologies can be summed up in two words - **PRESSURE** and **PRECISION** :

## PRESSURE

All Oxbow ACE-TEC boards are made in molds that apply tons of pressure during the manufacturing process to bond the boards together perfectly, in one shot, over the whole surface.

## PRECISION

In order to handle the significant pressures used during this process Oxbow boards are made in precision engineered aluminum molds that precisely replicate the original board shape to the nearest millimeter, ensuring an exact replica of the shaper's original design every time.

This combination of **PRESSURE** with **PRECISION** is unique in the world of SUP board manufacturing, resulting in industry leading consistency and quality.

## Light Weight Performance AND Durability

### Key Features:

- Molded, Lightweight and watertight 15 kg/m<sup>3</sup> EPS Foam Core.
- Fiberglass reinforcement for improved stiffness and performance.
- ASA Polymer outer skin for unmatched durability and impact resistance.
- Embossed EVA foam pad for maximum comfort.
- Molded external inserts – no penetrations through outer shell and maximum strength.

## Ergo-Grip Handle

Standard on all ACE-TEC boards.

Re-curved inner surface for easy loading and transport.

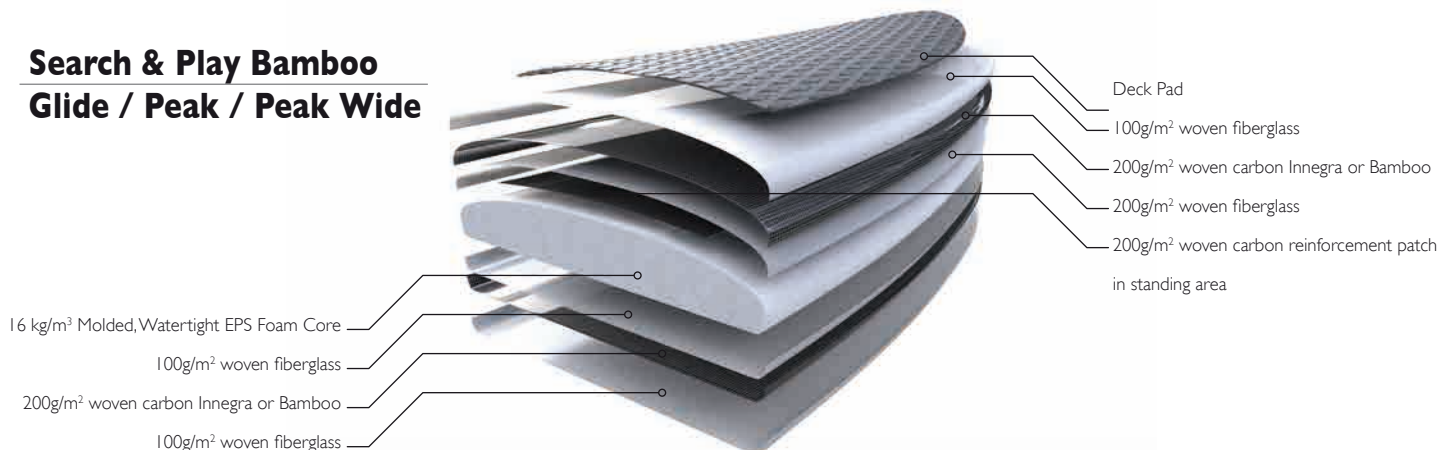

## Custom Technology for Minimum Weight with Maximum Performance

### Key Features:

- Lightweight EPS foam cores for minimum weight.
- Search & Play Bamboo : Wood sandwich for durability and beautiful aesthetic.
- Peak / Glide : Carbon-Innegra sandwich for minimum weight, competitive stiffness and improved durability.
- Racer : Uni-Direction Carbon for minimum weight, maximum stiffness and performance.
- Localized reinforcement for key impact areas, improving durability in specific areas while minimizing weight overall.
- Brushed matt finish for improved glide, protection from the sun.
- Embossed or Diamond groove pad according to function.

### **Search & Play Bamboo** **Glide / Peak / Peak Wide**

### **Racer**

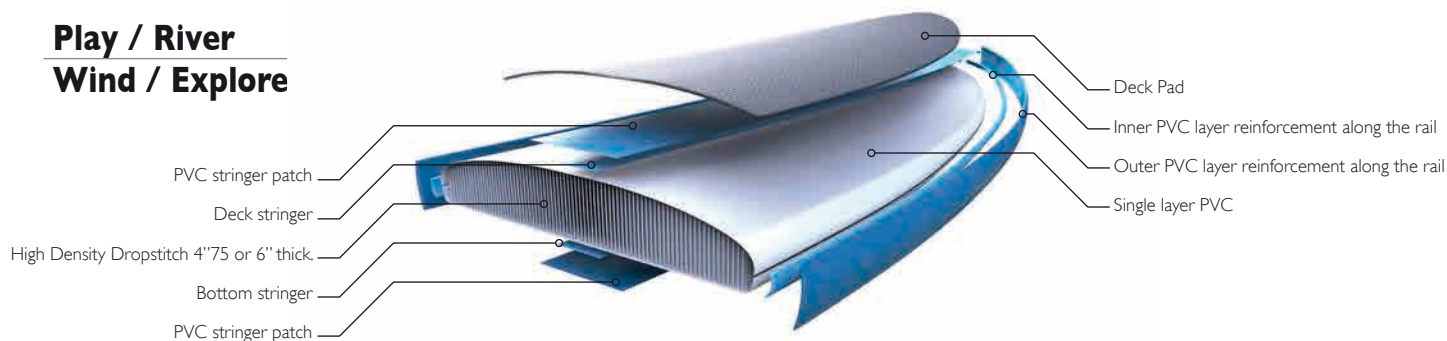

## No-Flex Stringer construction for lightweight yet rigid inflatable boards

### Key Features:

- High density drop stitch material for stiffness and performance.
- Single layer deck and bottom construction for light weight, improved finish.
- Play & River Air : Deck and bottom stringer with no-flex properties for maximum stiffness and controlled rocker profile / Wind & Explore Air : Composite stringer for maximum stiffness.
- Double belt construction on the rails for durability.
- Tail inflation for easy packing and rolling from the nose.

# SEARCH

## **The Ultimate All-Around Beach Board**

Searching for a paddleboard that's equally adept in the surf zone as it is cruising on flat-water? The search is over! Oxbow's Search series features performance-minded surf designs blended with confidence-inspiring stability and a moderate rocker profile for versatility in flat-water conditions. Five sizes accommodate riders of all sizes. Available in ACE-TEC construction (9'2" / 10'6" / 11'6") for lightweight performance AND durability at a great price, as well as our authentic bamboo construction (10' / 11') for incredible beauty and lightweight performance.

### **KEY FEATURES**

- Surf-Inspired Longboard Shapes for stable flat water cruising and wave surfing performance.
- Attachment Points – Leash plug at tail + 2 or 4 attachment points in front of standing area for securing gear.
  - Embossed EVA deck pad is plush and comfortable while offering excellent traction.
- Moderate rocker profile to maintain glide in flat water while still performing in the surf zone.
  - Round Thumb Tail shape for smooth rail transfers and pivot turns.
- Ergo-Grip carry handle for ease of transport and less fatigue (ACE-TEC).

# PLAY

## Stable, Versatile Flat-Water Fun

From first-timers to families or for fitness, fishing and yoga, the Play series is designed to inspire confidence and deliver performance for a wide range of SUP disciplines and riders of all sizes, including beginners up to 350 pounds! With a flat deck area and multiple deck attachment points it's easy to customize the board for your intended use. Full rail-to-rail volume and ample width create amazing stability while a unique keeled nose design and full waterline increase speed, efficiency and glide. Available in ACE-TEC construction (10' / 11' / 12') for lightweight performance AND durability at a great price, as well as our authentic bamboo construction (10'6") for incredible beauty and lightweight performance.

### KEY FEATURES

- Keeled nose - Enhanced tracking and increased glide for fun cruising and exploring.
- Full rail-to-rail volume - Enhanced stability, maximum use of the entire deck and a dry ride.
- Attachment points - Multiple attachment points for securing gear and easy transport.
  - Flat deck - Perfect for family fun, cruising, fitness & yoga.
- Ergo-Grip carry handle for ease of transport and less fatigue (ACE-TEC).

# EXPLORE

## **Touring Performance in All Conditions**

The Explore series is designed for a quiet, smooth and stable paddling experience cruising around your local lake, bay or river yet is fully capable and proven as a serious expedition worthy board in all types of conditions. A sharp vee entry at the nose parts the water smoothly and transitions to a displacement hull through the front half of the board for maximum responsiveness and maneuverability. This transitions to a flat planing hull in the back half of the board for stability and tracking. Available in two sizes to accommodate riders from 80 to 260lbs.

## **KEY FEATURES**

- Award-Winning Touring Shapes. 2013 Outside Magazine's Gear of the Year.
- Go Further, Faster, Quieter. Designed for efficiency, stability and FUN.
- The keeled nose cuts smoothly through the chop while the flat section under the standing area and tail improve stability.
- Attachment Points – Leash plug at nose and tail + four attachment points in front of standing area for securing gear.
- Ergo-Grip carry handle for ease of transport and less fatigue.

# GLIDE

## **Touring Perfection**

The Glide series, featuring our authentic bamboo construction, looks as good as the designs performs. Excellent glide and stability combine to deliver smooth performance for touring your local waterway or setting out on more exciting day trips or multi-day expeditions. Available in two widths in the 12'6 size (27" & 29") as well as a 14' x 28" version for longer excursions.

## **KEY FEATURES**

- Ultimate touring boards for flatwater cruising and expedition paddling.
- Authentic Bamboo sandwich construction for durability, lightweight and a beautiful aesthetic.
- Deck attachment points (5x nose + 5x tail) for securing gear and accessories.
- Embossed EVA deck pad for added traction and comfort.
- Ergonomic carry handle for ease of transport.

**Martin Vitry**  
RACER 12'6" X 25.5"

# RACER

## Speed & Balance for Maximum Performance

Ideal as a dependable 'one-board quiver' with the speed you need to perform at your peak combined with the stability required to stay upright and focused on the task at hand. Featuring full carbon construction for lightweight, rigidity and maximum speed, the Racer series are competition-level boards that excel in flatwater, open ocean, beach and downwind race conditions. A full nose outline with lowered profile is ideal for penetrating chop in rough conditions as well as reducing cross-wind interference. The wide cockpit standing area allows for full use of the deck area and provides a 'corrugated' design for added rigidity and durability. Rail edges in the rear of the board are slightly rounded and combined with a relaxed tail rocker for minimal drag.

Available in both 12'6" and 14' lengths.

### KEY FEATURES

- High-Performance race boards for all-water conditions.
- 100% unidirectional carbon construction for rigidity and lightweight.
- Moderate rocker profile for maximum glide while maintaining performance in chop and downwinders.
- Nose and tail attachment points.
- Premium diamond grip deck pad for traction and comfort.
- Ergonomic carry handle.

# PEAK

## Pure Surf Performance & Style

The Peak series of surf-specific paddleboards are the result of years of testing and refining to find the ideal blend of outline, rocker profile, volume distribution, bottom contour, fin placement and foil. The result is an all-conditions design with the stability needed to make paddling enjoyable without losing true wave performance. With the speed you need on softer open-face waves and the looseness required in steeper, tighter pockets, the Peak series delivers on the promise of maximum fun regardless of the size or shape of the waves you ride. Featuring light weight carbon innegra construction and available in four sizes for riders of all sizes and skill levels.

### KEY FEATURES

- Versatile surf SUPs for all types of waves.
- 100% Carbon-Innegra construction for lightweight performance and knock resistance.
  - Thinned out rail profile for added bite and reduced swing weight.
  - Volume hidden along stringer for added stability.
- Flat section under standing area to enhance stability and glide through flat sections.
  - Narrow tail for surf-performance once on the wave.
- Diamond grip EVA pad for added traction and comfort.
- FCSII 5-fin set-up with 10" center box (8'2 & 8'8 only) / 2+1 fin set-up included.
- Ergonomic carry handle.

\*\*Estimates are for intermediate SUP surfers. Your skill level significantly affects how much volume you need in your surf SUP board. Advanced SUP surfers will achieve maximum performance with lower volume/narrower boards, but must have the skills necessary to ride low volume boards.

# PEAK WIDE

## **Surf Performance Meets Stability & Comfort**

The Peak Wide series offers a more user-friendly and stable platform while maintaining the surf performance our Peak series is known for. Instead of simply adding volume and width, which can result in a stable yet unresponsive board, we custom tailored the foil and rocker outline to match the wider templates of these models. This allows the board to still hold rail even in tighter pocket waves and still maintain speed and maneuverability on the open face.

## **KEY FEATURES**

- Wide and Stable with solid surf performance
- 100% Carbon Innegra Construction for lightweight yet durable performance, with a surf board flex.
- Brushed paint finish to reduce overheating without adding the additional weight of a full paint job.
- Diamond Groove EVA deck pad for excellent traction and comfort.
- Ergonomic carry handle for ease of transport.
- FCSII 5-fin set-up with 10" center box / 2+1 fin set-up included.

### PEAK WIDE 8'4" x 31"

Length	8'4"   254cm

# PLAY RIVER

## Lightweight, Rigid, Durable, Portable

Oxbow AIR inflatable paddleboards feature ultra-light, durable and extremely rigid construction for performance typically found only in rigid boards. By adding a non-stretch stringer along the top and bottom center line together with double layer rail construction we've reduced weight, dramatically increased rigidity and improved ease of re-rolling and packing the board after use. The AIR models inflate to a rigid 15psi and come with an oversize wheeled backpack for ease of transport and storage, rugged two-way pump with gauge, packing straps, removable center fin with easy on/off thumb screw, repair kit and valve wrench.

### PLAY Air

Stable, versatile flat-water fun in a compact, portable design.

### RIVER Air

Whitewater specific shapes with extra grab handles, low-profile fins and extra rocker.

## KEY FEATURES

- Versatile shapes for all-round use.
- Board thicknesses varied according to intended function.
  - Play & River 7'6" : with 4 3/4" thickness for thinner rails and better surfing, improved stability due to lower center of gravity.
  - River 9'2" : with 6" thickness for better stiffness.
- Ultra-light construction = easy to carry.
- Top & Bottom stringer improves stiffness vs. traditional inflatables.
- Deck bungee cord for storing gear.
- Carry handles at nose, tail and center.
- Play : Embossed EVA deck pad is plush and comfortable while offering excellent traction.
- River : Diamond grip EVA pad for added traction and comfort.
- Universal center fin box with removable center fin.
- Includes oversize wheeled backpack, heavy duty 2-way pump with pressure gauge and repair kit.

## TWIN PIN Adjustment System

Proven and reliable, our TwinPin non-mechanical adjustment system is easy to use and extremely reliable. Made of rugged polycarbonate with a rubberized texture for added grip. Featured on Performer FP and Travel FP paddles.

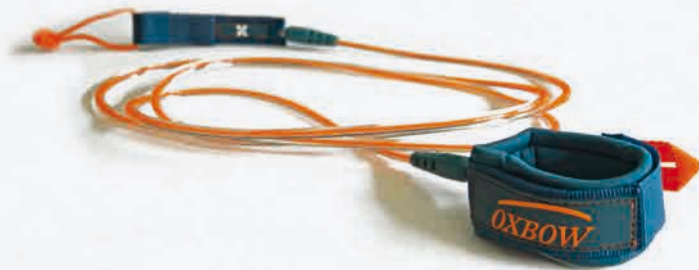

## LEVERLOCK™ Adjustment System

This system gives the feel and performance of a fixed-length paddle with the versatility and convenience of an adjustable. Featuring an infinite adjustment range, no clunky adjustment mechanism to get in the way and no parts to lose. Made of rugged polycarbonate, fiberglass and stainless steel for maximum durability and performance. Featured on PERFORMER CF & CC and Travel CF paddles.
