## Zegul – Precision Nordic Watercraft

Zegul was established in Sweden in 2008 by professional kayakers Alexander Nyberg and Johan Wirsen. They went out to create a high-performance sea kayak with excellent tracking and rock solid stability that would supersede other kayaks of the time. The legendary Zegul 550 was thus born. Tracking better, and going faster than the competition, Zegul 550 made a big splash in the paddling world, thanks to its hard chines and avant-garde hull shape.

Over the next decade, famous kayak designer Hans Friedel expanded the range around the principle that stability and performance are not mutually exclusive. Today Zegul kayaks are sold in over 30 countries and continue to intrigue the paddling enthusiasts wherever they are introduced. To this day Zegul's products are handmade in Estonia by master boatbuilders, ensuring that the spirit of Nordic kayaks lives on.

Zegul 2022 lineup is a comprehensive range of 28 kayaks of different skill-levels, purposes and materials. Recreational users enjoy the combination of stability and lightness of Ormen and Dreki series. Zegul Touring and Play models represent variety of hull shapes, volumes and layups. Our Specialty and Expedition kayaks make up a unique selection of products designed and improved by those who have conquered the areas of the world unseen for most of us.

# Zegul

# NORDIC-SPIRIT

Zegul has the Nordic (Finnish) mindset of reaching past perceived limitations and transforming barriers into frontiers

# CONSTRUCTION

## ZEGUL 3-LAYER HDPE

When enhanced durability and stiffness over a single layer HDPE construction are needed, a three-layer sandwich of polyethylene foam between two polyethylene skins provides improvements. Although heavier than most single layer alternatives, the 3-layer HDPE lay-up provides the best combination of stiffness and durability for the cost. \*Except Ormen series see page 14-15.

## ZEGUL A-CORE

This lay-up increases durability and stiffness of the kayak, absorbing even less energy during paddling and withstanding the most challenging environments. All ZEGUL A-CORE built kayaks are equipped with sandwich reinforced keel area - ensuring scratch and impact strength. Hull and deck are joined using internally both fiberglass and aramide taping, externally a very robust aramide taping. All decks are built in sandwich construction.

## ZEGUL 3D C-CORE

Kayaks built with this method are finished with a clear carbon hull, which takes years of experience to be done correctly. We have added a new 3 dimensional carbon fabric into this construction, resulting in even tougher and stiffer kayaks. The ZEGUL 3D C-CORE kayaks are built using full HD LRA core lay-up in the kayak hulls. This production method combines vacuum infusion technology with high performance properties of special marine grade epoxy resin and several types of carbon fiber, carbon/aramide and glass multi-axial fabrics to create probably the highest quality carbon core built kayaks in the industry. These kayaks are even more versatile than the regular carbon/aramide and carbon built kayaks on the market.

## ZEGUL FULL CARBON

This production method combines vacuum infusion technology with the high performance properties of a special marine grade epoxy resin, several types of carbon fiber, carbon/aramide and glass multi-axial fabrics to create the highest quality carbon core built kayaks in the industry. Years of experience are needed to perfect a clear carbon hull using three dimensional carbon fabric which results in the stiffest, most durable kayak.

## ZEGUL FLAX

The Zegul Flax lay-up is a special construction that uses flax fibre fabric combined with glass multi-axial fabric. The flax fiber material has best damping capabilities than any other fiber on the market due to the built of flax fibers as it has many concentric layers in one fibre. This makes the material similar to carbon material in terms of strengths and damping. The flax fiber construction is finished with a clear coated gel coat which means the beautiful material will be completely visible on the kayak. This lay-up is available for Zegul Easy with matching details.

# COLOR OPTIONS

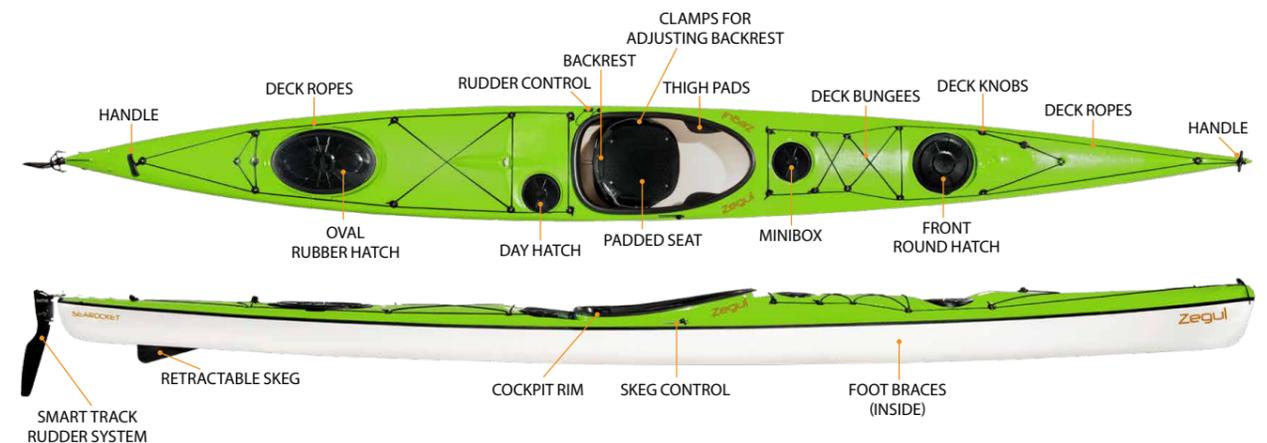

Main colour options for Zegul HDPE are simple - blue, red, yellow and lime green. Every kayak model has its own factory colour schemes. We use new polyethylene mix, which means that the material is with improved stiffness, higher UV resistance and the colours are more vibrant.

Total of six gelcoat options are available for composite kayaks: White | Red | Blue | Black | Zegul Orange | Lime Green. Every model has its own factory colour schemes. Special orders using any of the six gelcoat colours are possible.

# COMPONENTS

RECREATIONAL TOURING	LENGTH	WIDTH	WEIGHT*			CAPACITY	COCKPIT	STORAGE			CONFIG

RECREATIONAL TOURING  
**ORMEN**

**Ormen** series kayaks are suitable for everyone from beginners to advanced paddlers. These kayaks are easy to maneuver and stable. Ormen series features 3 different sized kayaks suitable for every paddler. Ormen series kayaks have a hard chine hull that provides great stability.

**Ormen LV** is a stable day-touring kayak for beginner to intermediate paddlers to build confidence and develop skills. This kayak has a comfortable and generous sized cockpit making it easier to enter and exit the boat. Short length keeps it maneuverable and also very easy to handle outside the water. Best suited for kayaking in inland waters.

**Ormen MV** is a touring kayak with superb maneuverability and good tracking. The hull type provides greater initial stability and a fair amount of speed. Ormen MV is well suited for any paddling day trip.

**Ormen HV** is a great touring kayak with an excellent glide and maneuverability. This kayak is an efficient kayak that maintains speed very well and has good acceleration. The hard chine hull provides greater initial stability and good maneuverability.

Ormen series kayaks are equipped with SmartTrack rudder and retractable skeg. Ormen LV, MV and HV are available in single-layer HDPE. **Zegul 1-layer HDPE** lay-up is made using only a single layer of high density polyethylene. We have upgraded our PE material so that the single layer is very stiff and durable, yet it is lighter than the other 2- or 3-layer constructions.

**STANDARD CONSTRUCTION** Zegul single-layer HDPE

**STANDARD FEATURES** Rubber hatch, thigh pads, SmartTrack foot braces, SmartTrack rudder, retractable skeg

**STORAGE** **Front:** round hatch 24 cm (10")  
**Rear:** oval hatch 44 x 26 cm (17" x 10 1/4")

**COLOURS**

RECREATIONAL TOURING  
**EASY**

As the name suggests, **Zegul Easy** is extremely easy to handle, as it is well maneuverable and stable due to its length and width. This makes the kayak suitable for a wide range of activities from day touring to fishing. Zegul Easy is compact and efficient, suitable for all sorts of paddlers. It has a well-balanced hull, so that the rudder is only needed for longer trips. Unique design makes it very fast for its length. The size of the kayak makes it easy to handle outside of water and a bigger cockpit allows easy entry into the kayak.

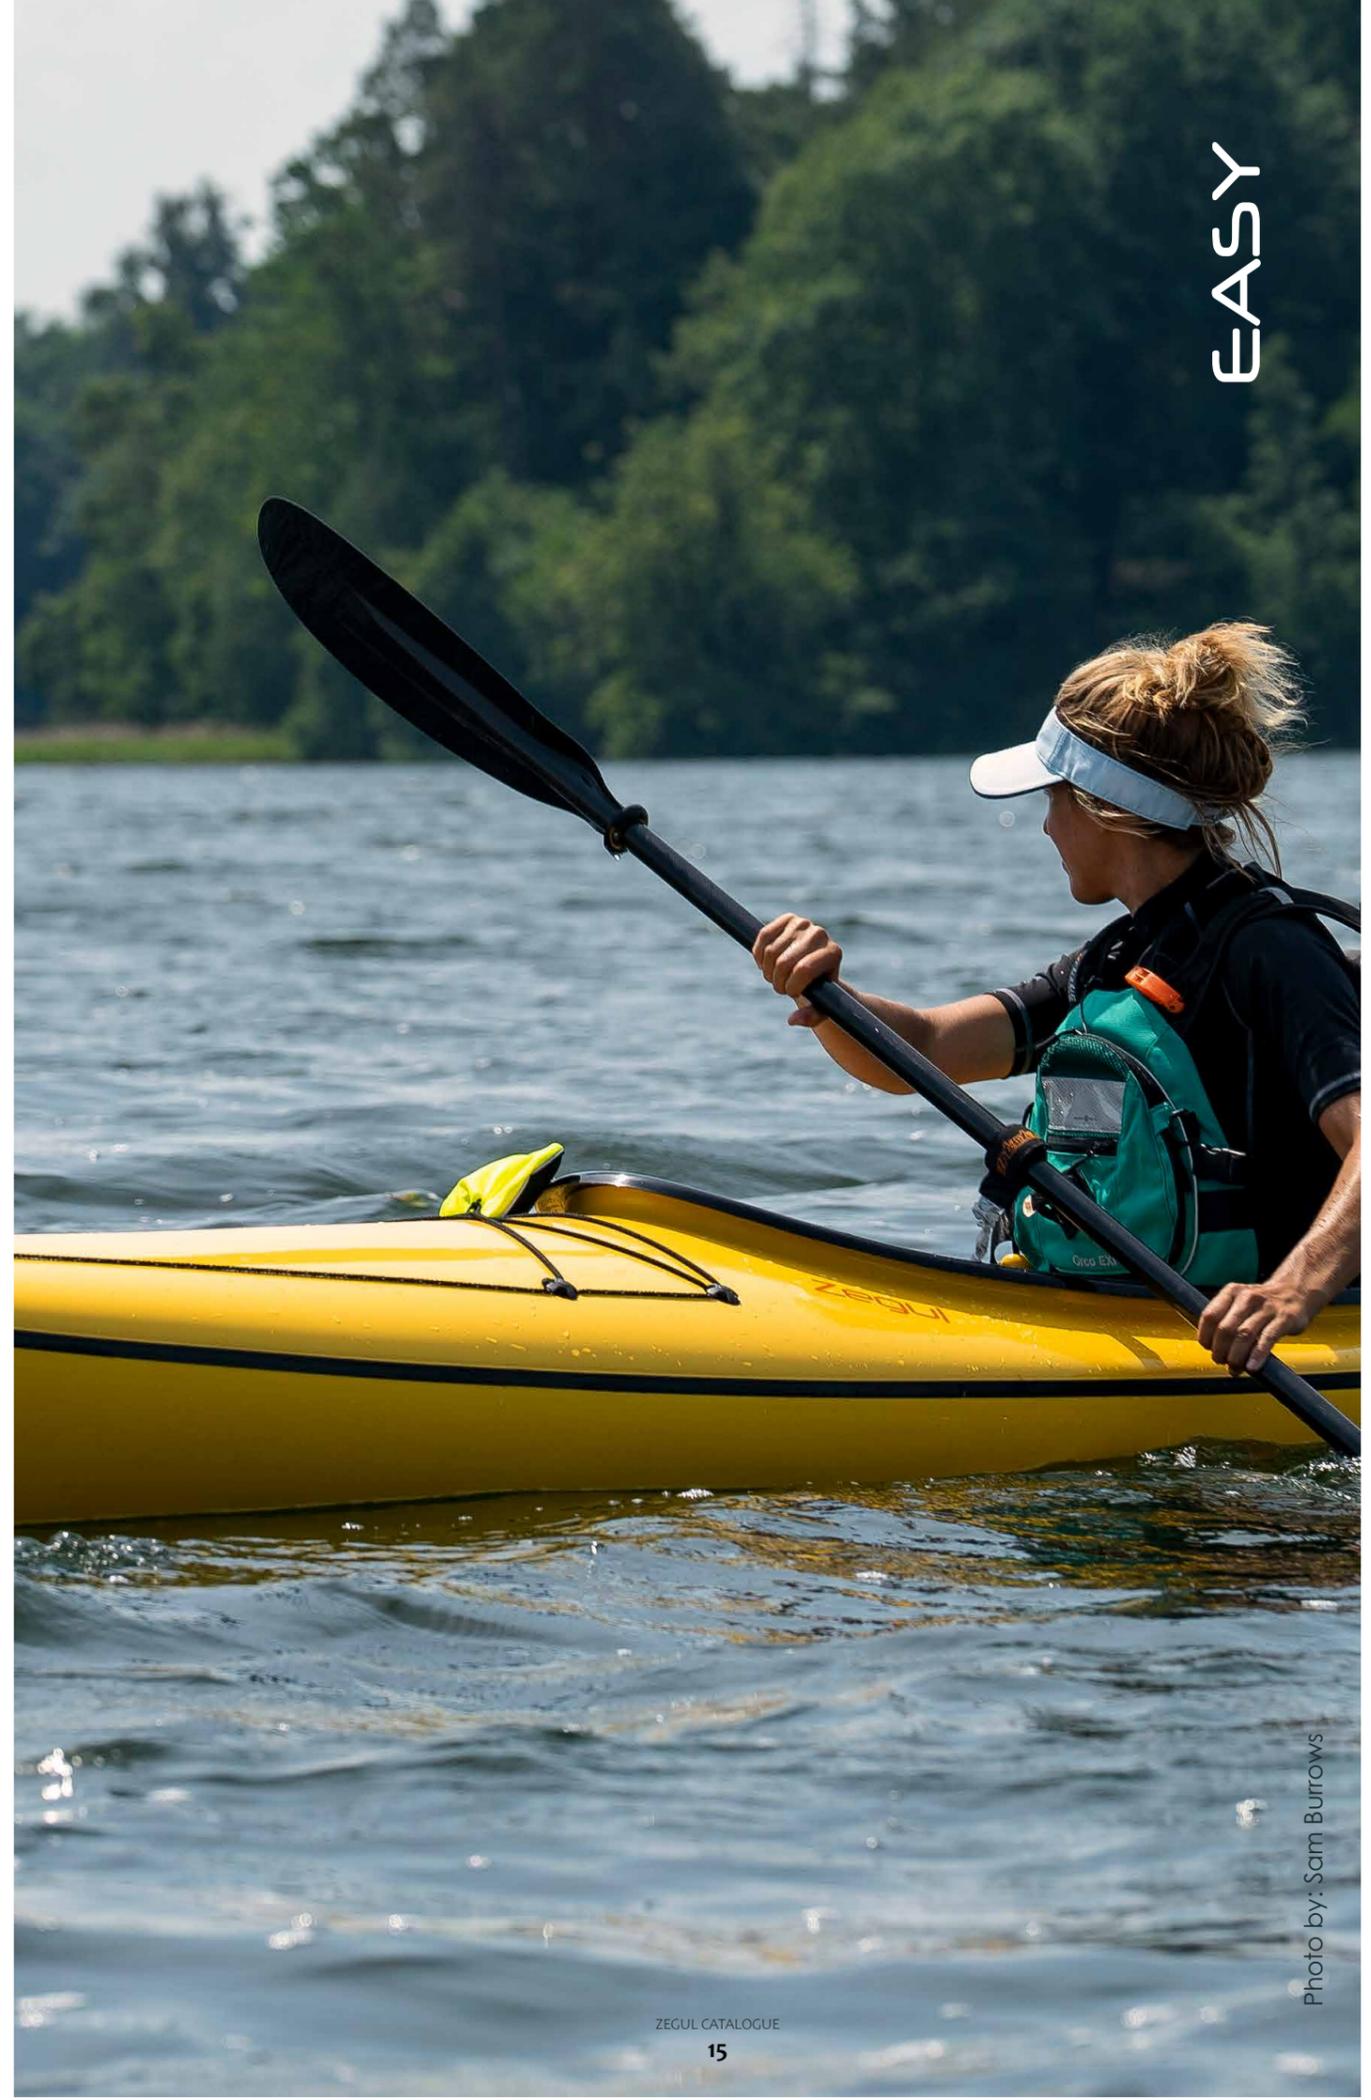

The Zegul Flax lay-up is a special construction that uses flax fibre fabric combined with glass multiaxial fabric and the material has similar features to carbon material in terms of strengths and damping. The flax fiber construction is finished with a clear coated gel coat which means the beautiful material will be completely visible on the kayak. Zegul Easy Flax comes without hatch and rudder.

The Zegul Easy is equipped with a SmartTrack rudder. Zegul Easy is available in A-core, Full Carbon and Flax fiber versions.

RECREATIONAL TOURING  
**DREKI**

**Dreki series** kayaks meet the needs of a wide range of paddlers. These kayaks are for paddlers looking for stable onwater experience rather than getting wet through a playful day on the water. The hull has a flat V-design, which provides high initial stability. The Dreki series is intended to be paddled in calmer inland waters.

**The Dreki LV** is the smallest volume kayak in the series, providing smaller paddlers with a sub-compact boat that is easy to store and carry to the water. Dreki LV is lively on the water - it turns on a dime when needed, whilst still having good tracking capabilities on flat water.

**The Dreki MV** is very easily maneuverable. This kayak has been brought to the market to be paddled more in inland waters. It is designed for smaller and medium sized paddlers who want to enjoy a roomier cockpit during paddling.

**The Dreki HV** is a perfect recreational kayak for those looking for a stress free paddle. It is roomy and stable, with an extremely long waterline providing good speed and glide. It is designed for a medium to large size paddler, who wants to enjoy a roomier cockpit.

The Dreki series kayaks are equipped with a SmartTrack rudder.

**STANDARD CONSTRUCTION** Zegul A-Core

**STANDARD FEATURES** Rubber hatch, thigh pads, SmartTrack foot braces, SmartTrack rudder

TOURING  
**REVAL PE**

**Reval kayaks** are British style kayaks with slightly more volume. Reval series kayaks have superb stability and performance in all sea conditions. These kayaks are responsive and really easy to turn. The hull is designed with rocker and upswept bow and stern. The initial stability of Reval kayaks is a little higher, providing a secure feeling. Reval is a superb sea touring kayak suitable for paddlers who are looking for a nice British style kayak that can handle more challenging sea conditions. The kayak deck is equipped with 1 oval hatch, 1 round hatch, a mini-box in the front and a day-hatch for easier access into compartments.

**The Reval LV PE** is the lowest volume kayak in the series. LV is perfect for a medium sized paddler who wants to enjoy a roomier cockpit area. The LV cockpit with thigh braces provides an easier entry and good support.

**The Reval MV PE** has slightly more volume than the LV version, which makes it well suited for weekend-trips and shorter expeditions. Reval MV is a tough kayak ideal for all adrenaline seekers. The MV is responsive and wonderfully stable even in breaking waves and strong winds.

The Reval series kayaks are equipped with SmartTrack foot braces, a retractable skeg and is rudder ready. The Reval LV and MV are available in 3-layer HDPE.

Reval is a superb sea touring kayak suitable for paddlers who are looking for a nice British style kayak that can handle more challenging sea conditions. The kayak deck is equipped with 1 oval hatch, 1 round hatch (2 oval hatches for the Reval MV), a mini-box in the front and a day-hatch for easier access into the compartments.

**The Reval LV** is the lowest volume kayak in the series. LV is perfect for a medium sized paddler who wants to enjoy a roomier cockpit area. The LV cockpit with thigh braces provides an easier entry and good support.

**The Reval MV** has slightly more volume than the LV version, which makes it well suited for weekend-trips and shorter expeditions. Reval MV is a tough kayak ideal for all adrenaline seekers. The MV is responsive and wonderfully stable even in breaking waves and strong winds.

**The Reval HV** is the highest volume kayak in the Reval series. Reval HV has a roomy cockpit, which makes it suitable for taller and bigger paddlers. Higher volume also means more room for storage, which makes the Reval HV a perfect kayak for longer trips.

The Reval series kayaks are equipped with a SmartTrack rudder and a retractable skeg. The Reval LV, MV and HV are all available in Zegul A-Core lay-up.

TOURING  
**SAGA**

**Saga kayaks** are fast, efficient and a joy to paddle. Saga features a shallow V-shaped hull which ensures fast acceleration, speed, and a nice balance between maneuverability and tracking. It suits for a wide range of kayakers with different skill levels. Saga can handle a variety of paddling conditions on the ocean and is equipped with three hatches and spacious storage compartments for all the equipment you may need. Saga is an excellent choice for exercise and longer expeditions.

The Saga series kayaks are equipped with the SmartTrack rudder system and a retractable skeg. The Saga is available in 3-layer HDPE and in A-core lay-ups.

PLAY BOATING  
**PLAY PE**

**Zegul Arrow Play** series kayaks are all performance sea kayaks, developed specially for maneuvering and playing in the sea. These kayaks are also excellent for day trips and longer overnight getaways. The hull has significant rocker and volume in the bow to avoid diving when riding down the wave. The mid-section has a slightly rounded profile, making it very smooth from edge to edge. This combined with the hard chines make the Play a joy to paddle whether you enjoy the rough stuff or just want a sea kayak that responds instantly to your moves. The Play series has proven to be our most popular sea kayaks in Scandinavia. Zegul Play series deck is smooth with soft lines; especially the front deck, which will catch less wind. The deck line outfitting is also practical and the overhang in the bow has been lowered and extended.

**The Play LV PE** is the smallest kayak in the Play series and is suitable for smaller paddlers. Play LV still offers plenty of storage for longer trips.

**The Play MV PE** has a slightly raised deck compared to the Play LV for more comfort and room in the cockpit. The key selling point for the Play MV is versatility – it fits a wide range of paddlers in almost all skill levels.

The Play series kayaks are equipped with a retractable skeg. The Play LV PE and MV PE are available in 3-layer HDPE.

<b>STANDARD CONSTRUCTION</b>	Zegul 3-layer HDPE

TOURING/EXPEDITONS  
**NUKA PE**

**Zegul Nuka MV PE** is a touring kayak for smaller paddlers. It has rounded hull for less resistance and less wet surface making it glide very well through the water. The Nuka MV PE is a touring kayak and has much practical deck line layout. The rear hatch is oval making it easy to load the kayak on overnight trips. The Nuka MV PE has less rocker and more raking bow and stern which increases the waterline when loaded.

The Nuka MV PE is equipped with a retractable skeg and can be easily fitted with a rudder for those who prefer to focus forward momentum rather than the correction strokes and edging.

Nuka PE is available in 3-layer HDPE.

<b>LENGTH</b>	505 cm (16'7")
<b>WIDTH</b>	52 cm (20 1/2")

EXPEDITION / TOURING  
**EMPOWER**

The Zegul Arrow Empower is the ultimate expedition kayak specially made for long trips and expeditions. The Empower is a surprisingly agile and, despite its length, has a very nice glide. Empower acts almost like a play boat when put on edge. The Empower kayak has soft chines and a long waterline. The hull profile is rounded and rocker is moderate to handle big seas. The four hatches are all beautifully recessed into the deck and allow packing with ease for extended trips or just for a weekend getaway. The knee hatch can hold gear like VHF radio or a cell phone and a small water bottle. The day hatch has lots of room for other equipment necessary while at sea.

The Zegul Empower is equipped with a SmartTrack rudder and a retractable skeg. Zegul Empower is available in A-CORE and Full Carbon lay-up.

EXPEDITION / TOURING  
**BARA**

**Zegul Arrow Bara** is a mid-sized sea kayak that can handle rough water and longer distances. It has good carrying capacity, is easily maneuverable and has a more solid platform. It is designed keeping roomy cockpit in mind. The kayak suits well for a wide range of paddlers who need a high performance touring and expedition kayak. Several storage compartments allow you to load up all your gear and the day hatch keeps your essentials close while on the water.

The Zegul Arrow Bara is equipped with SmartTrack rudder and retractable skeg. Zegul Bara available in A-CORE.

SPECIALITY  
**GREENLAND**

**Greenland series** is inspired by genuine skin-on-frame Greenland hunting kayaks. With the classic lines and low volume traditional design, the Greenland is extremely responsive to paddler's input. Zegul Greenland style kayak has particularly low volume and a tight fit to your body, which gives you full control and brings you closer to the water than ever. The kayak has a hard chine all the way along the V-bottomed hull and high rocker to ease maneuvers. The Zegul Greenland series is designed for paddlers who want a traditional style kayak and make eskimo rolls look easy.

**The Greenland T** is a classic Greenland style kayak with a slightly roomier design suitable for longer daytrips, without sacrificing the true characteristics of the famous Greenland kayaks.

**The Greenland GT** has a smart design and is meant for paddlers wanting a classic Greenland style kayak, but need more comfort, storage space and stability for longer outings. The Greenland GT has a slightly wider hull, adding more stability, and a roomier keyhole cockpit, which enables easier entrance and exit. GT has a day-hatch and an enlarged rear hatch, increasing its storage capacity.

The Greenland series kayaks are equipped with a retractable skeg. The Greenland T and GT are both available in Zegul A-Core lay-up.

## AIR DRY SUIT

**Air drysuit is a multipurpose light waterproof top layer paddling suit** that leaves you room for base layers and won't restrict your paddling motion. It offers an outstanding performance and comfort for paddlers wanting a breathable and extra lightweight suit. Air drysuit has latex collar and cuffs that minimizes water entering the suit. Suitable for kayaking, stand up paddling, sailing and fishing.

**MATERIAL** 3-layer Nylon

**FEATURES** YKK easy entry zipper between legs that can be used as a toilet zipper;  
reinforced bottom and knees with strong reinforcement fabric;  
latex cuffs and Neoprene collar;  
adjustable bungee drawcord waist

**SIZES** XS-3XL

**COLOURS** Red

## SPRAYSKIRTS & COCKPIT COVER

### BASIC SPRAYSKIRT

**MATERIAL** 200D Nylon Ripstop PU coated on the waist tube and 400D Nylon PU coated on the deck

**FEATURES** Adjustable waist tube with cinch cord and stopper; elastic rim band

**SIZES** L-4XL

**COLOURS** Black

### NEOPRENE SPRAYSKIRT

# Z LINE

## KAYAK / CANOE

**The Z-line rotomolded and composite boat collection breaks out into three series offering suitable kayak/canoe for all recreational users:**

**1. Sit-On-Top kayaks: Aqua Moon and Kailua.** These are super stable recreational kayaks that are really easy to use. Aqua Moon is a simple one person kayak that has plenty of storage for your essentials. Kailua is fit for 2 people and there is an extra seat for child in the middle.

**2. Sit-In kayaks: Fit 96, Fit 111, Lifestyle Solo, Playspirit, Bayspirit and Oceanspirit.** Starting from Fit 96 and ending with a composite Oceanspirit, everyone is able to find a suitable recreational/touring kayak for themselves. Fit series kayaks are perfect for beginners starting their paddling activities as these models are really easy to maneuver and are truly stable. Lifestyle Solo

is a nice touring kayak that is suitable for a smaller person or a child. The Playspirit is a fun touring kayak, that can even handle waves and rough weather conditions. Bayspirit and Oceanspirit are the composite kayak models in the range. These kayaks are fast and stable sea kayaks, Oceanspirit has the highest volume. All these models have proven to be true bestsellers throughout the years.

**3. Canoe: Yuma.** This canoe model is suitable for families as well as rentals as they are durable and offer also high capacity.

All plastic kayaks are available in either **orange** or **turquoise blue/green** colour versions and canoes in classic **red** or **green**.
