

The image is a first-person perspective from the front of a red kayak on a calm lake at dawn or dusk. The water is still, reflecting the soft light of the sky. In the distance, a lone kayaker is visible on the water. The background features rolling hills under a pale sky. The text 'Riot kayaks' is in the top left, and '2013 CATALOG' is below it. At the bottom left, there is a slogan and a website URL.

KAYAKS WITH A SENSE OF PURPOSE
riotkayaks.com

WELCOME TO THE WORLD OF RIOT KAYAKS

We believe kayaks are a great way to get in touch and stay in touch with the outdoors.

With Riot kayaks you can experience the world from a different perspective; be it a quiet ride, a day on the water, a long trip, or conquering a bigger river and everything that lies in between.

We also believe that the equipment you use matters because these precious moments should be enjoyed with a craft that doesn't compromise on quality, gear, or safety. That is why, in virtually all the products we offer at any price point, you will find that our boats are better designed and better equipped.

This year we are also launching an extensive line of thermoformed kayaks for people that are looking for lighter, faster, and, let's face it, nicer boats. We will also seek to connect better with our customers via online tools and our website so that we can ensure people are getting the most out of our products and by extension their experience.

With that in mind, get out there and enjoy!

The Riot Team

WITH RIOT, SAFETY COMES FIRST

Today's economy has put a lot of pressure on manufacturers to cut costs wherever they can so that they can reach a certain price point; due to this we feel some boats are lacking certain features that can make an enormous difference if you are in a difficult situation. While it is true that in the end the customer is always right, we feel

that you should be informed about these security features, most of which you will find on all of our models. Please also note that while these features are the ones you can expect from a quality kayak, there are a series of other security measures that need to be followed in order to ensure your safety.

SEALED BULKHEAD

The sealed storage bulkhead allows the kayak to float horizontally on the surface of the water, rather than the stern filling with water.

SECURITY BAR

Our security bar is simply the strongest, easiest and most effective theft deterrent available for your kayak. Whether you're grabbing a bite to eat or just need to leave your kayak on top of your vehicle, it's important to consider that it only takes a thief about 30 seconds to steal your boat. A safe lock goes a long way in making sure you still have a kayak for your next adventure.

SAFETY STRAPS

The safety straps will secure the paddle shaft if needed for a paddle float rescue. This stabilizes the kayak while you get back in.

REFLECTIVE LIFELINES

Synonymous with safety and visibility. The retro-reflective quality makes this lifeline very visible at night so people can see you while you're on the water, resulting in less accidents.

CONSTRUCTION

Cross-Max CONSTRUCTION

ROTOMOLDED POLYETHYLENE CONSTRUCTION

Using the best grade of rotomolding polyethylene, our Cross-Max process combines by-design reinforcement to the natural mechanical qualities of HDPE to provide the right equation of stiffness, weight, durability and quality of finish.

Cross-Light CONSTRUCTION

THERMOFORMED TECHNOLOGY

Cross-Light construction is the perfect combination of the advantages of rotomolded and composite boats. It creates a boat that is up to 25% lighter, stiffer, faster, and let's face it, looks better than a comparable rotomolded boat while being significantly tougher and more affordable than a comparable composite boat. With Cross-Light you get it all: lightweight, beautiful, tough, and durable.

CUSTOM FIT SEATING SYSTEM

Want a little more arch on your backrest? No problem. More curves for your bottom or a snugger fit on the sides?

SURE. RIOT'S CUSTOM FIT OUTFITTING DOES IT ALL...

Our new seating system not only has all the adjustments offered by top-of-the-line seats – like height and position adjustment for the backrest as well as leg lifters so you can position your seat for your body – it's also made so that you can customize key parts of your seat to your individual body, allowing you and your boat to become one.

A large part of the seat is moulded into the boat so that it doesn't move from side to side and actually helps to reinforce the boat structurally, and the backrest is reinforced with a torsion bar that ensures your back is properly supported without being forced to bend under pressure.

CUSTOM FIT PACKAGE

FEATURES

CONTOUR FIT SEATING SYSTEM

Our molded-in seating system welcomes you with a cushy, compression-molded seat pad and our proven conforming touring backrest, both covered with the best U-V treated, abrasion-resistant fabric. Set the backrest at the perfect height for you and then one cam buckle conveniently located in front of the seat will allow you to find your preferred back angle: simply pull on the strap and the backrest wraps around your back for more support. Or press the cam buckle tab for a more laid back approach to this afternoon on the lake.

CUSTOM FIT SEATING SYSTEM

Our custom seating system not only has all the adjustments offered by top-of-the-line seats – like height and position adjustment for the backrest as well as leg lifters so you can position your seat for your body – it's also made so that you can customize key parts of your seat to your individual body, allowing you and your boat to become one.

TRACKRITE - SKEG

Our spring-loaded polycarbonate skeg is attached to our kayaks by an injection axis support that as the double-purpose of guiding the skeg and making the fastening completely watertight. The ratchet slider allows you to choose from 10 positions so you can fine-tune the skeg's exposed area for better control.

PILOT RUDDER

Made from glass-reinforced plastic, the pilot rudder is light and strong with a profiled blade. Of course we retained the low-windage openwork design, the vibration-dampening rubberized V-block and the oval pulleys that made our Pilot rudder system well known for its smoothness of action.

ADJUSTABLE ROD HOLDER

This mounted holder rotates 360° and adjusts vertically for precise placement. Standard rod holder has a rear saddle that accepts all types of rod and reel combinations. A large, smooth swivel-locking ring prevents rod loss, and the vertical swivel movement allows easy rod positioning.

SIT-ON-TOP SEAT

With four attachment points, mounted on independently adjustable straps, our comfortable sit-on-top high back and seat combo lets you customize your position to perfection in just a minute, and stays put whatever the conditions.

DECKPLATE (4" AND 10")

Our deck plate designs provide access without the use of tools. They are molded with the highest ABS standards using top quality UV stabilizers and antioxidants. The 4-inch is made with a single start, non-jamming, extra strong, self-cleaning buttress thread. The 10-inch features 2 locking handles which make opening and closing easy.

DUAL DENSITY HATCH COVER

A snap to remove and to put back on, the dual density hatch cover provides a sleek and sure way to seal your kayak's compartments. It is permanently attached to the kayak through a bungee cord, and is made of soft rubber molded around a stiff central insert so water pressure can't flex it in. Note: all specified hatch dimensions are those of the true opening.

FLUSHMOUNT ROD HOLDER

The Flush-Mount Rod Holder adds a unique dimension to the sport of kayaking. It provides a convenient and functional place to rest a fishing rod while fishing, paddling, or trolling. The low profile makes loading, transporting, and storing your kayak easier. The design accepts many rod styles, and will certainly make fishing more fun.

CHOOSING A KAYAK THAT FITS YOUR ADVENTURE:

RECREATIONAL

Made for all types of kayakers; recreational kayakers make paddling effortless and exciting. Its roomy cockpits provide a good stability and will let you stretch out and enjoy the sun.

8-9

DAY TOURING LV and HV

Created for paddlers who want to extend their time on the water and focus on the expedition.

10-13

TOURING SINGLE and TANDEM- SEA

Built for paddlers of all skills who are looking for speed and comfort. Also provide more storage for your belongings.

14-15

BOAT SPECIFICATIONS

16-17

SIT-ON-TOP

Accessible to all, a stable and capable platform; the perfect base for your aquatic adventures.

18-19

FISHING

Equipped to facilitate fishing trips with multiple rod holders and compartments to store your gear.

20-21

WHITEWATER

Thoughtfully designed for Playboating, River running, Creeking and Surfing.

MAIN FEATURES

HIGH - PERFORMANCE CONTOUR FIT

The High-Performance Contour Fit maximizes your torso's range of motion to ease rolling and more advanced maneuvers, without trading off on comfort. Also equipped with a floating backrest for extra floatation.

SUREGRIP THIGHBRACE

The Suregrip is our most advanced thighbrace design. Its pronounced hook shape is combined to a rounded inner edge to facilitate entry and exit, while providing an unequalled efficiency through its non-slip neoprene outer layer, covering the whole knee area.

WHITEWATER - PLAYBOATING

The Astro series offers a crisp and dynamic freestyle playboating. With release edges all around the hull, the perfect amount of rocker back and forth and just the buoyancy you need to push it down enough, without staying down too long upon landing. The result? A bouncing machine that will let you show it off without kicking you off the curb in the next turn. All these features serve the purpose of putting you in the right place at the right moment. Whether you land frontwards or backwards... we'll leave that up to you!

ASTRO 54

Features:

- › Unity seating system
- › Floating Backrest
- › Suregrip thighbraces
- › 2 Rubber grab loops
- › 2 Rubber handles
- › Security bar
- › Drainplug
- › Powerseat compatible

WHITEWATER - RIVER RUNNING

THUNDER 65

MAIN FEATURES

HIGH - PERFORMANCE CONTOUR FIT

The High-Performance Contour Fit maximizes your torso's range of motion to ease rolling and more advanced maneuvers, without trading off on comfort. Also equipped with a floating backrest for extra floatation.

SUREGRIP THIGHBRACE

The Suregrip is our most advanced thighbrace design. Its pronounced hook shape is combined to a rounded inner edge to facilitate entry and exit, while providing an unequalled efficiency through its non-slip neoprene outer layer, covering the whole knee area.

FRONT AND REAR FLOATATION BAGS

The front floatbag provides buoyancy in the event of a swim and also supports the footbrace from behind. The rear floatbag wraps around the rear pillar so it stays in place. Deflate it partially to put gear in the back of your kayak and then inflate it again to fill the voids so water has no place to go, securing your cargo at the same time.

WHITEWATER - RIVER RUNNING

A current is energy: any source of energy is worthless until it's channeled, cleverly conducted towards an effect. That's exactly what the Thunder does. Point it upstream and its bevelled edges and flat, shallow hull will make any ferry effortless. Point it downstream and all that speed makes it punch through everything smoothly. Just like a reversible switch.

THUNDER 65

Features:

- › Unity seating system
- › Floating Backrest
- › Suregrip thighbraces
- › Adjustable creek footbrace
- › Front and rear floatation bags
- › 4 tubular webbing grab loops
- › 2 Rubber handles
- › Security bar
- › Drainplug
- › Powerseat compatible

FRONT AND REAR FLOATATION BAGS

The front floatbag provides buoyancy in the event of a swim and also supports the footbrace from behind. The rear floatbag wraps around the rear pillar so it stays in place. Deflate it partially to put gear in the back of your kayak and then inflate it again to fill the voids so water has no place to go, securing your cargo at the same time.

WHITewater - CREEKING

Creeking is one of those things where science and unknown can't be separated completely. At least it seems this way. But let me pull the strict science out of the pile: the Magnum. This thing sums up all the knowledge the Riot paddlers have acquired about creeking since day one. The right length and shape to punch well through features without losing too much momentum and end up going vertical. How to make it buoyant yet maneuverable... Now walk confidently towards the unknown, science has been well taken care of.

MAGNUM 72
